Notable Notes from the Principal:

Happy New Year!

Welcome back from what I hope was a happy and safe Winter Break. We are excited to see what 2022 brings for us.

With the lifting of restrictions, we hope to take more field trips, including the end-of year ones. We look forward to being able to get out and be more involved and spread our joy and achievement to our community.

As we keep waiting on the snow, please make sure you are connected on Dojo or Remind for notifications of snow days or delayed starts. We will also post it on Facebook, our website, and the local news stations. With the weather turning colder, please send your students in the appropriate clothing for outdoor recess, GLOBE will do indoor recess if the "feels like" temperature is 19 degrees or below.

Welcome back to the second semester and a Happy New Year!

Katherine Siegel,

Director of Education/Principal

February Sneak Peek:

- 2/4 - Board Elections/Village Assembly & Art Walk
- 2/8 SAC Meeting
- 2/21 - Presidents Day-NO School
- 2/28 - Board Meeting

Teachers Spot Light

Holly Ferrell—Second Grade Teacher

As the holidays come to an end, and we begin the New Year, our 2nd grade will be learning about North America's geography, and environments for living things in Science. We will also dive into graphing and measurement in math and the kiddos will continue to work on writing about descriptive personal events. We look forward to the new year and all it has to offer us.

Mission Statement

- Maintaining High Academic Expectations
- Inspiring Student Learning
- Fostering a Caring Community
- Connecting with the World
- Preparing Students for Life

Vision Statement

GLOBE Charter School educates Kindergarten through Sixth Grade students academically, emotionally, and socially to become involved productive citizens of the world.

Specials

Deena Smith-Music Teacher

Happy New Year! I want to thank all the families that attended our Holiday concerts! Even though our rehearsal time was cut short before Thanksgiving, we were able to still hold our concerts. I know a lot of people were appreciative of being able to gather and hear our students perform. January is a good time to accomplish a lot of learning in the music room. The students are refreshed just after a break, and we can concentrate on music basics that are so necessary to be successful. Our band students have learned several notes and are getting better sounds every day on their instruments. I am enjoying being here at GLOBE, and am looking forward to learning more music with our students!

Kathy Corbett-P.E. Teacher

It is so great to have all of your children back at school. In PE we are continuing our unit on catching and throwing, learning the specific techniques of the underhand throw and the overhand throw. We will be practicing our throwing and catching with a game called Jail Ball. Ask your athlete how to play Jail Ball, as I'm sure they would love to tell you. In some of our classes we are also playing some special math relay throwing and catching games with addition, subtraction and multiplication math facts.

News from Nurse Jen

Cold & Flu Season is upon us. The following are reasons to keep your child home from school

1. Your child does not feel well enough to participate in normal activities.
2. Your child needs more care than staff can give and still care for other children.
3. Your child's illness is on this list:
 - Diarrhea (child may return 24 hours after last episode)
 - Fever (100 degrees - child should be fever free for 24 hours without medication before returning to school)
 - Flu-like symptoms
 - Cough (severe, uncontrolled, or wheezing)
 - Rash with fever
 - Vomiting - (child may return 24 hours after last episode)

If your child presents with these symptoms during the day, you will be called to pick him/her up.

Casey Friesen-S.T.E.A.M. Teacher

In January in STEAM we will be learning about coding and robotics! Younger students will learn the basics of what is a code by using block coding. What this does is it allows students to see that a certain button/color makes the robot do a certain function. As for the older students we will be working on coding some very nice robots that the Air Force Academy lent out to our school. These robots can range from basic functions from moving back and forth to complex functions that involve servos, sensors, and motors to pick items up. In order to write the code for these robots, students will have to learn a computer-based language called "C." I am very excited to see what the students can do with coding!

January Birthday's

Ms. Dettman-4th/5th Grade

Kinder-Lily, Wyatt, & Helena

3rd grade- Saoirse

5th grade- Jackson, & Jesse

6th grade - Andrew
